PROFILE

Recently graduated professional with internship experience in **SOFTWARE TESTING, WEB DEVELOPMENT, PROJECT MANAGEMENT** and **HARDWARE INTEGRATION**.

Seeking to take the next step in my career with a future oriented perspective, open to new possibilities and career options.

WORK EXPERIENCE

QA Software Testing Engineer Intern
February 2019 – August 2019
Zennio Avance y Tecnología S.L.

- Design test cases and suites for hardware-software mixed systems.
- Execution of test suites to determine the validity and quality of a software application.
- Designed, implemented and tested a Raspberry Pi distributed system and management web application for building complex domotic virtual hotel integrations. Ultimate goal is replacing expensive physical domotic devices in testing environments.
- Management app is formed by an Angular based client and a Node.js server used by the company in order to configure and build virtual hotel integrations.

EDUCATION

Bachelor Degree of Computer Science – Software Enineering
2014-2019
Universidad de Castilla La-Mancha, Spain

Relevant Knowledge :
- Project Management, Quality Control, Information Systems Processes and Security, Databases Design and Development, Software Engineering Design and Development Processes, Web Development.
